Hey!

Hello! Ask me anything about

how does care contribute to the green , secure, and circular mobility ?

Care contributes to the green, secure, and circular mobility by emphasizing the importance of ensuring the wellbeing of employees and communities. This care extends to health, safety, and development of all stakeholders involved. By prioritizing human rights considerations, implementing inclusive growth principles, and focusing on environmental and social considerations guided by good governance, care plays a crucial role in fostering a sustainable and inclusive environment. This approach leads to the development of innovative solutions, collaborative efforts, and a commitment to good governance practices, all of which are essential for promoting green, secure, and circular mobility initiatives.

Describe about the driving Decarbonisation for a greener world

The strategic objective is to achieve Net Carbon Zero by 2035 through the development of solutions for decarbonisation and the utilization of innovative technologies to combat climate change. Investments are being directed towards renewables and alternative energy to reshape operations in the renewable energy sector. The ultimate goal is to offer affordable green energy while prioritizing the collective well-being of humanity. This commitment to decarbonisation is aimed at driving a greener world by reducing carbon emissions and promoting sustainable energy practices.

how many solar energy is targetting by the end of 2030?

100 GW

give me the detailed information about the JioGenNext ?

JioGenNext is a program established to assist early-stage startups in achieving growth and scalability. It operates with an annual cohort and continuously onboards startups throughout the year. The program focuses on offering guidance and opportunities to startups by providing access to industry experts from Reliance, Jio, and the industry. JioGenNext's Market Access Programme (MAP) engages startups to explore opportunities within the Reliance ecosystem and receive hands-on guidance for scaling up. The program has a rich mentor pool that includes senior leaders from the Reliance ecosystem, startup founders, and CXOs from the industry. JioGenNext also offers personalized business mentorship for each startup on various aspects such as product innovation, go-to-market strategy, hiring, marketing, fundraising, and product-market fit. Additionally, JioGenNext launched MAP'22 in FY 2022-23 with seven high potential startups and partnered with MeitY Startup Hub to provide opportunities for startups to access mentors, investors, and develop proof of concept solutions within the Reliance, Jio, and industry ecosystem.
